Summary and Personal Statement

I am a Front End Web Developer with 12 years of experience in the field of web solutions design and development. I have a strong knowledge of some of the most popular CMS, programming tools and web technologies.

On top of that, I possess a good understanding of digital marketing and worked with large clients in Europe to deliver a number of smart and highly effective digital strategies as a SEO/SEM consultant.

My profession is also my hobby, and I spent a lot of time on self-education, learning new technologies and sharing my experience with global web communities.

I believe that the collaboration of people with different skills and opinions along with smart management is a key success for any project.
